MAXIMUM PRICES OF AGRICULTURAL COMMODITIES AND THEIR PRODUCTS

Compiled by
Margaret F. Cannon
Assistant Agricultural Economic Statistician

The following report shews, in chronological order, the maximum price regulations that have been issued by the Office of Price Administration on each agricultural commodity and its products, all along the line from the farmer to the consumer. The purpose is to give an over-all picture showing at what level the products are controlled, and briefly what the type of regulation is. The notations are necessarily abbreviated and incomplete. In general, they do not include exceptions, differentials, regulations for individual cities, prices for new container types and sizes, etc. Domestic products only are included.

A farm price is listed opposite the effective date of each maximum price regulation. This is the average price received by farmers for the original agricultural commodity on the 15th of the month preceding, or, if the effective date falls on the 15th, the price is as of that date. In the case of commodities for which season average, but not monthly, prices are available, the season average prices for 1941 and 1942 are shown at the end of the table.

There are few maximum price regulations at the farmer's level, although the prices received by farmers do, of course, reflect indirectly the restrictions on prices at other levels. The General Maximum Price Regulation excepts the following:

- 1. "Any raw and unprocessed agricultural commodity ... while it remains substantially in its original state."
- 2. "Sales or deliveries by a farmer, of commodities grown and processed on his farm, if the total of such sales or deliveries does not exceed \$75 in any one calendar month."

According to these two stipulations, the only ceilings directly affecting the farmer are on products processed on the farm, provided they are sold directly to ultimate consumers, and provided the total sales of such products exceeded \$75 in one month. Exceptions are to be found for a few commodities, covered by special maximum price regulations. In the case of several processed products, the farmer is considered a wholesaler or a retailer, and must conform to the price regulations at those levels. The only agricultural commodities on which an unconditional ceiling has been placed at the farmer's level are: corn, peanuts, soybeans, tobacco, maple sugar and maple syrup, cane syrup, extracted honey and beeswax, natural-condition dried prunes and raisins, alfalfa hay, broom corn, hops, rabbits, and feathers and down.

This compilation is made as of April 5, 1943. From time to time, as it becomes necessary, a supplement to this publication will probably be issued. In addition, a summary of the maximum price regulations issued each month will be carried currently in Agricultural Prices, copies of which may be obtained from the Bureau of Agricultural Economics.

At retail level.

At farmer's level, applies only to sales and deliveries made directly by a farmer to an ultimate consumer if during

the preceding month such sales of all food products produced on his farm exceeded \$75.

X Exceptions: (1) Dried whole eggs to U.S. or any agency, where delivery must be made in Jan. and Feb. 1943 (MPR 280, Am. 1, 12-7-42); (2) Shell eggs for hatching (MPR 280, Am. 5, 1-8-43).

Y From Dec. 2, 1942 to Jan. 15, 1943, wholesalers and retailers had the choice between Supp. Reg. 14, Am. 1, and MPR 249 and 250, respectively.

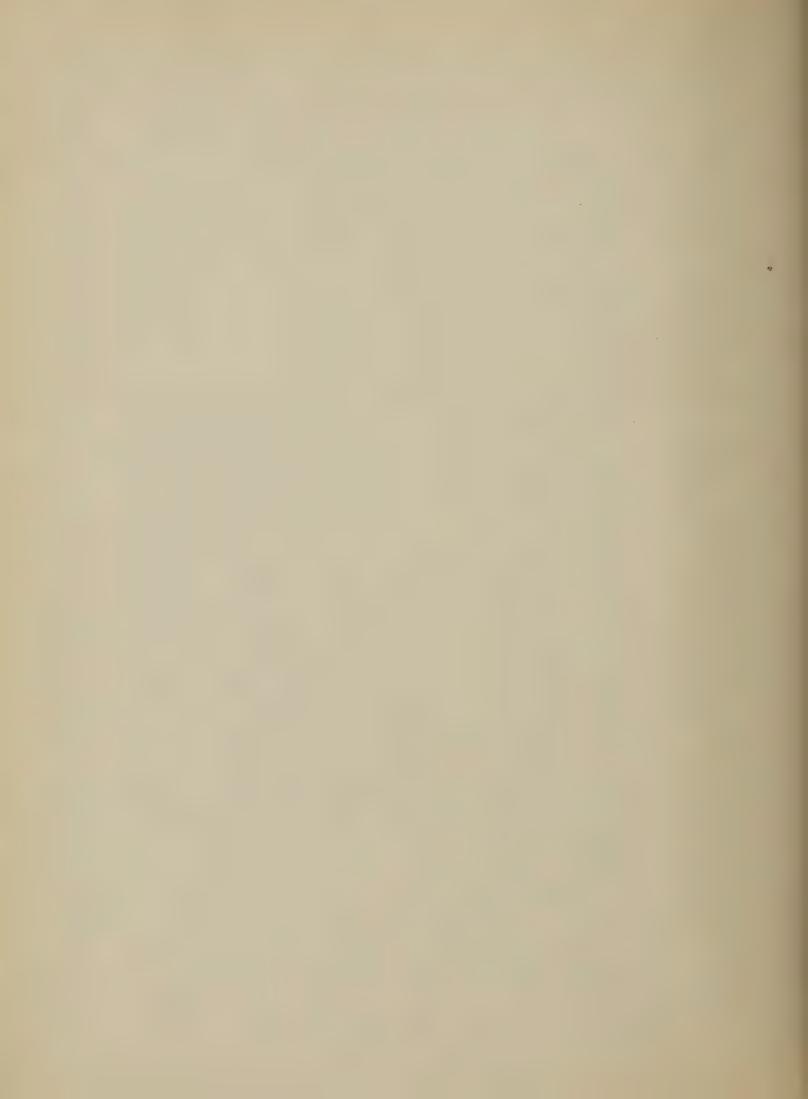

Revoked by MPR 255, Amendment 4 and Rev. MPR 256, Amendment 2.

Includes only hen eggs. Assorted eggs that are candled and regraded by retailers and hatching eggs are exempt. Does not include sales at the farm except retail sales.
